About Me

I'm a full-stack web developer with a broad knowledge of both backend and frontend technologies and frameworks. I have a background in classical music where I learned the value of patience and hard work and developed an aptitude for creative thinking.

Experience

Modea

Associate Software Engineer

- 2021-Present
- Full-stack development
- I build large-scale, patient-facing websites for hospitals and healthcare systems; these are built primarily with either Drupal or Wordpress.
- I work regularly with CMS's and React; languages most commonly used include PHP, JavaScript and JQuery, Python, and HTML and CSS;
- Modea is a consultancy; I work with clients and stakeholders on a daily basis to ensure we are adapting to challenges and developing great products.
- I work in a team setting in an Agile environment alongside PMs, Designers, QA Engineers, and other Developers

Catharsis Winds, LLC

Hornist, Financial Manager

- 2016-2020
- Developed superior organizational and managerial skills
- Responsibilities included managing Catharsis Winds, LLC, handling matters relating to finances, including managing bank accounts, credit cards, filing taxes, and booking hotels and flights for both domestic and international travel.
- As a musician in the group, I cooperated on a deeply personal level with my fellow musicians, learning to compromise and persevere to create something bigger than ourselves.
