

Willem Crone

Senior Software Engineer | Full-Stack Developer

 will.crone11@gmail.com |  540-797-7345 |  Nashville, TN |  [LinkedIn](#) | [Portfolio](#)

Professional Summary

Experienced Senior Software Engineer with 5+ years of full-stack development expertise, specializing in large enterprise web applications and mobile development. **Proven track record of leading complex healthcare and enterprise projects serving millions of users**, with strong experience in WordPress, Drupal, React, TypeScript, and other modern web technologies. Demonstrated leadership in mentoring developers and driving technical modernization initiatives that improved performance, security, and maintainability across multiple large-scale projects.

Technical Skills

Languages: JavaScript, TypeScript, PHP, Python, HTML, CSS/SCSS **Frameworks:** React, React Native, Next.js, Ionic, Tailwind **CMS:** WordPress, Gutenberg, ACF, Drupal, Twig **Cloud & DevOps:** AWS (Amplify, CloudFront, S3), Pantheon, Docker, GitHub Actions, Bitbucket Pipelines, SonarQube **Search & Data:** Solr, Relevanssi, Yext, Firebase **Integrations:** Google Maps/Places, Epic, MyChart, Press Ganey **AI Tools:** Claude Code, Cursor, Gemini CLI, GitHub Copilot

Professional Experience

Modea | Nashville, TN | Software Engineer I → II → III | Aug 2021 – Present

Siteman Cancer Center (Lead Developer) | March 2025 – Present

Redesign (7 months, ongoing) | live-siteman-washu.pantheonsite.io

- Built a custom WordPress theme from scratch with a one-command local dev setup, template-based CSS loading, and automated CSS/JS asset hashing for cache-busting
- Architected a dynamic content system combining structured content and Gutenberg components, delivering **15+ custom post types** and **19 custom Gutenberg components** in the first 7 months
- Engineered the **Find Your Way tool** — a wizard system that lets editors build multiple-choice question flows via a custom, Miro-like drag-and-drop canvas in the WordPress admin, built with vanilla JavaScript and SCSS
- Designed every component to be 100% editor-customizable, earning client praise including *"so thoughtful," "you can't get lost,"* and *"so incredibly helpful"*

- Achieved perfect **Lighthouse 100** scores (Performance, Accessibility, Best Practices) across every page template

Current Site Maintenance | siteman.wustl.edu

- Migrated from on-premises hosting to Pantheon; built automated CI/CD pipeline with GitHub Actions deploying to DEV on merge, SonarQube scanning on every push to main, and daily backups across all three environments
- Implemented multi-layer caching (Pantheon Advanced Page Cache + Object Cache Pro / Redis) and rearchitected CSS from monolithic to per-template delivery
- Lifted homepage Lighthouse Performance from **44** → **78** and cut First Contentful Paint from **4.4s** → **1.1s**
- Developed pediatric cancer content architecture (dedicated templates, taxonomy, specialized search, and 10+ reusable components) for families dealing with childhood cancer

Keck Medicine of USC (Lead Developer) | 2+ years | keckmedicine.org

- Led redesign consolidating **23 sub-sites** into a unified WordPress application serving **~1M monthly users**; shipped SEO gains that outranked LA-area healthcare competition
- Architected custom Find a Location and Find a Provider tools with Google Maps integration, plus global search using Pantheon Solr
- Built a full page template library and 15+ custom reusable Gutenberg components
- Mentored client dev team via weekly training sessions, establishing internal WordPress expertise

Vanderbilt Health Ecosystem (Co-Lead Developer) | 2+ years | vanderbilthealth.com, childrenshospitalvanderbilt.org, myhealthwalkin.com

Inherited and modernized a 6-year-old headless Drupal ecosystem (3 frontends, search app, component library).

- Consolidated **6 repositories into 3** (50% reduction) and migrated from deprecated AWS Beanstalk to Amplify
- Completed Next.js upgrade and app router migration, requiring a near-complete frontend refactor
- Cut acceptance test runtime from **10min** → **2min** (80%) via concurrent execution; eliminated 60–70s local build times with live reload
- Reduced security vulnerabilities from **1,100+** → **250** (77%) via dependency updates and Snyk integration
- Built dynamic Drupal modules automating Yext doctor data sync and Staywell-powered condition/treatment page generation, plus a full retheme of Vanderbilt Children's Hospital

Vanderbilt Specialty Pharmacy (Lead Developer) | vanderbiltsspecialtypharmacy.com

- Led redesign using atomic design principles, delivered **2 months ahead** of a 6-month timeline
- Built 20+ reusable components across 5 page templates, designed as a scalable library for reuse across 500+ sites in the Vanderbilt ecosystem

Additional Projects

- **Luminis Health** | luminishealth.org — Supported post-launch stabilization focused on MyChart integration and a Find Care tool

- **MHO Reflections Companion** (Co-Lead) | [iOS App Store](#), [Google Play Store](#) — Built mental health companion mobile app from scratch (Ionic, React, TypeScript) with check-ins, assessments, data viz, and journaling; launched on iOS and Google Play, now serving 100+ patients
 - **Chesapeake Regional Health** (Lead) | chesapeakehealth.com — Implemented the project's first Bitbucket pipeline, upgraded Angular v9 → current, and built an automated Press Ganey API integration for nightly doctor review updates
-

Leadership & Mentoring

- Designated internal WordPress expert; built a 3-month training program and mentored 2 internal + 2 client developers
 - Lead technical consultant for 3 enterprise healthcare clients across multi-year engagements, delivering Epic, MyChart, Yext, and provider data integrations at enterprise scale
 - Established internal WordPress best practices adopted company-wide
-

Education

Full-Stack Development Certificate | Career Foundry | 2021

Bachelor of Music, French Horn Performance | Cleveland Institute of Music | 2020
